Istruzioni di montaggio

Verwendung:

- Für den Einbau muss ein ebener, tragfähiger, schwingungsfreier Untergrund vorhanden sein.
- Für Acrylbadewannen bis 2000 × 900 mm

-  Die einschlägigen Verarbeitungsrichtlinien aller beteiligten Gewerke sind zu berücksichtigen.
-  1 Die Schraubenlänge ist zu beachten. Der Wannenerboden muss mindestens 15 mm stark sein.
-  2 Nach dem Ausrichten der Badewanne die höhenverstellbaren Füße mit der Sechskantmutter gegen erneutes Verstellen sichern.
-  3 2 Wannerrandklemmstücke + 2 Wannerrandklemmleisten/Wannerrandauflegeleisten.

Use:

- For installation, a flat, firm, vibration-free foundation is required.
- For acryl bath tubs up to 2000 × 900 mm

-  The relevant processing guidelines of all trades involved are to be considered.
-  1 The screw length has to be observed. The tray bottom should be at least 15 mm thick.
-  2 After alignment of the bath tub, lock the height-adjustable feet by the hexagon nut against misadjustment.
-  3 2 tub rim clamping pieces + 2 tub rim clamping strips/tub rim supporting strips

Toepassing:

- Voor de montage moet een vlakke, stevige, trillingsvrije ondergrond aanwezig zijn.
- Voor acryl badkuipen tot 2000 × 900 mm

-  De relevante verwerkingsrichtlijnen voor alle betrokken gespecialiseerde werkzaamheden dienen in acht te worden genomen.
-  1 De schroeflengte moet worden in acht genomen. De vloer onder de bak moet tenminste 15 mm dik zijn.
-  2 Na het uitlijnen van de badkuip moeten de in hoogte verstelbare pootjes met de zeskantmoer tegen opnieuw verstellen worden geborgd.
-  3 2 bakrandklemstukken + 2 bakrandklemstrippen/bakrand-draagstrippen

Utilisation:

- Pour l'installation, il faut une surface plate, portante et sans vibration
- Pour baignoires en acrylique jusqu'à 2000 × 900 mm

-  Les directives de traitement en vigueur pour tous les corps de métiers engagés doivent être respectées.
 -  1 La longueur de la vis doit être respecté. Le fond du bac doit avoir au moins 15 m d'épaisseur.
 -  2 Après le dressage de la baignoire, bloquer les pieds réglables en hauteur avec l'écrou hexagonal pour éviter tout dérèglement.
 -  3 2 crochets fixation de baguette d'appui + 2 baguettes de blocage/baguettes d'appui de bordure de bac
-

Instructions de montage

Istruzioni di montaggio

Utilizzo:

- Per il montaggio deve essere presente una superficie di appoggio piana, di portata sufficiente e senza vibrazioni.
- Per vasca da bagno in acrilico fino a 2000 × 900 mm

 È necessario osservare le direttive specifiche di lavorazione di tutti i sistemi interessati

 ¹ La lunghezza di vite deve essere osservata. Il sottofondo della vasca deve essere spesso almeno 15 mm.

 ² Dopo aver posizionato la vasca da bagno, bloccare i piedi di appoggio regolabili in altezza con i dadi esagonali per impedire che si spostino.

 ³ 2 elementi di bloccaggio del bordo della vasca + 2 listelli di bloccaggio per il bordo della vasca/listello di appoggio per il bordo della vasca
